PROFESSIONAL SUMMARY

Software Developer with hands-on experience building enterprise applications, ERP customizations, healthcare systems, and AI-powered solutions. Proficient in Laravel, React, PostgreSQL, Python, and Docker with strong expertise in REST API development, database design, and business process automation. Actively exploring Local LLMs, AI agents, RAG systems, and practical AI integrations, and sharing knowledge through technical blogs and open-source projects.

WORK EXPERIENCE

Software Developer | Intopros Technologies

Jan 2026 – Present

Tech Stack: Odoo, Python, Laravel, PHP, PostgreSQL, Docker, Git

- Develop and customize Odoo 18 ERP modules for CRM, Booking Systems, Website Builder, and Business Workflows
- Mentored and led 2 junior developers on Odoo module development, conducting code reviews and providing technical guidance
- Maintained and extended the Up-T JP e-commerce platform for a Japanese client, handling backend PHP development and client-facing integrations
- Build custom dashboards and workflow automation solutions for diverse client requirements
- Design and implement PostgreSQL-backed business systems with performance optimization
- Collaborate with UI/UX teams to translate business requirements into scalable ERP solutions
- Manage multi-container Docker environments for local and production deployments
- Customized website and backend modules for client-specific Odoo configurations

Software Developer | Midas Health Services

May 2024 – Oct 2025

Tech Stack: PHP, Laravel, PostgreSQL, MinIO, Git, Swagger

- Developed Pharmacy and Inventory modules within a microservice-based Hospital Management System
- Built and maintained RESTful APIs ensuring seamless integration across multiple backend services
- Designed reusable Traits, Services, and Helper components, significantly reducing code duplication
- Optimized large-scale PostgreSQL queries and migrated raw SQL to efficient Eloquent implementations
- Designed advanced reporting modules covering purchase, sales, and inventory analytics • Collaborated closely with frontend developers to align API design with UI requirements

FEATURED PROJECTS

BudgetBuddy

Laravel • React • PostgreSQL • Ant Design • ApexCharts

- Personal finance platform for income, expense, savings, and balance management
- Monthly balance tracking with a financial analytics dashboard and interactive charts
- Transaction categorization and a PostgreSQL-based reporting engine
- GitHub: github.com/manoj010/budgetbuddy

Odoo Booking Flow Builder

Odoo 18 • PostgreSQL • Owl JS

- Custom multi-step booking system inside Odoo with appointment and session management
- Website booking widgets and workflow automation for dynamic booking flows

NEPSE Index Notifier

Python

- Desktop notification app that monitors Nepal Stock Exchange index every 10 seconds with real-time alerts
- GitHub: github.com/manoj010/Nepse-Notifier

Suvida – Bike Seller & Service Platform

Laravel • MySQL • Bootstrap

- E-commerce platform for bike sales and servicing with product catalog, bookings, ratings, and admin dashboard
- GitHub: github.com/manoj010/Suvida

TECHNICAL SKILLS

Languages	PHP, Python, JavaScript, TypeScript, SQL
Frameworks & Libraries	Laravel, React, Odoo 18, FastAPI, Node.js, Fastify, Flutter
Databases	PostgreSQL, MySQL, MongoDB, Supabase
DevOps & Infrastructure	Docker, Redis, MinIO, GitHub Actions, Vercel, Linux, cPanel
Tools	Git, GitHub, GitLab, Postman, Swagger, DBeaver, Figma
AI & Emerging Tech	Ollama, LM Studio, Local LLM Deployment, AI Agents, RAG Systems, Prompt Engineering

TECHNICAL WRITING

Author at manojale.com.np — covering AI Model Quantization, Local LLM Deployment, Context Engineering, AI Agents, Odoo Development, and broader software development topics.

EDUCATION

Bachelor's in Information Technology (BIT) — Kist College, Purbanchal University
